ELK GROVE VILLAGE, IL (September 11, 2019) – Krusinski Construction Company (KCC) is pleased to announce its recent groundbreaking ceremony for Yamazen Inc.'s new modern headquarters located at 111 Northwest Point Boulevard, Elk Grove Village, Illinois.

Yamazen, an industry leader in the sale and distribution of machine tool equipment and a subsidiary of Yamazen Corporation Japan, will be relocating its current Schaumburg-based operations and staff to its new two-story, 138,000-square-foot headquarters upon substantial completion in summer 2020.

Once complete, the facility will feature approximately 50,000 square feet of private and open offices, conference rooms and the remaining area will consist of large spaces for product demonstrations and robotics. The distribution space will include two loading docks, two drive-in doors, 32' clear height, and 137 car parking spaces.

The building will allow for Yamazen's future expansion of staff as it grows its three main divisions: machinery, tooling and automation, in the coming years.

The project team consists of: Krusinski Construction Company as general contractors; Ketone Partners as owner representative; Cornerstone Architects, Ltd. as architect; and V3 Companies, Ltd. as civil engineer.

#### **ABOUT KRUSINSKI CONSTRUCTION COMPANY**

Founded in 1973, Krusinski Construction Company is a leader in providing comprehensive construction services by creating long-lasting partnerships. KCC delivers solutions to complex building projects in the Chicago metropolitan area with national reach in a wide range of industries. KCC is an active member of the U.S. Green Building Council and is a founding member of Citadel Group, an alliance of seven "best-of-class" regional construction-related companies in 17 cities that have affiliated to serve the needs of national clients. For more information on KCC, visit [www.krusinski.com](http://www.krusinski.com).
